

What if...we Put the Park back into Parking?

o longer need your car?

What if your street was full of **pedestrians** and **nature** rather than traffic?

What if the air was clean, and the sounds you heard were **birdsong** and the breeze?

Along your street there could be **mini-parklets** instead of parking spaces, **spaces to garden**, or just **sit** and **chat** with your neighbours.

Do you have a **car parking space** where you live which you don't use? **Have you decided to give up your car?**

If the answer to either of these questions is **YES**, and you would like to turn your ex-car space into a **mini parklet**, get in touch!
