

What if...you could take a **Green Route** everywhere you wanted to go?

Nothing thrills like birdsong. What if you really enjoyed **walking** in your neighbourhood – strolling along the streets and through the **green spaces**?

We want to **reclaim** our urban spaces for **pedestrians**, to be filled with **bird song, clean air & chatter**. We want to **cut carbon & reduce pollution** from private cars & increase **wellbeing for all**.

How can we achieve this?

- By **creating** healthy & inspiring **pedestrian routes** across Camden, using our borough's many large & small gardens, parks & parklets

Encouraging more people to:

- **Walk** for commuting & leisure
- **Discover** our borough's green gems
- **Plant-up** their streets, homes & neighbourhoods to create living corridors

How to get involved:

- **Feed into the Council's Healthy Streets & Low Emissions consultations**
- **Watch out** for street-side info boards & new interactive sections on Camden Council Website
- Tell us about your **favourite** local green walking routes
- See if you can **plan** your own new green walks
- Tell us about your **treasured** Camden green spaces
- Contact us at: info@transitionkentishtown.org.uk
