

# What if... we created a Camden Forest?

here was a chorus of birdsong as you left your house. This song comes from birds perched in bushes and trees surrounding you. A veritable forest!

Many trees are in people's back gardens and they treasure them as their Guardians. Many have woven stories around their trees, and the growth of the trees and their stories are shared throughout the community.

The idea of tree planting as a way to capture carbon as recently caught the zeitgeist. The Camden Forest project has rapidly taken root in LB Camden and already has a membership of 250. Planting 2,025 trees by 2025 was set as a target. Each guardian has had their tree recorded on our database, along with the beginnings of its story. We have a website:

[camdenforest2025.wordpress.com](http://camdenforest2025.wordpress.com) Take a look to see how the trees we are mapping are rapidly developing into a forest.

If you would like to find out more, come to one of our tree giveaways, or sign up below.

You too can become a Camden Forest guardian.
